

Situation Report #8

COVID-19 PANDEMIC

April 8th, 2020

Issue : **Novel Coronavirus (COVID-19) Pandemic**
Location : **32 Provinces in Indonesia- 212 countries around the world**
Time : **December 31st, 2019**

I. Key Information

- On December 31st, 2019 Chinese Health Officials inform the WHO about mysterious Pneumonia, most are connected to Huanan seafood wholesale market in Wuhan
- On January 7th, 2020 Chinese authorities identify a new type of Coronavirus (called novel coronavirus or nCoV)
- Different from the previous corona virus, Covid-19 is transmitted from person to person
- The first coronavirus case outside of China was reported in Thailand on January 13rd, 2020, then on January 15th 2020 in Japan and January 20th 2020 in South Korea
- Novel Coronavirus has spread into 212 countries and territories around the world have reported a total 1,317,130 confirmed cases with 74,304 confirmed deaths
- Indonesian health authorities have confirmed 2,956 positive cases across the country, 240 cases confirmed deaths and 222 recoveries, on Wednesday, April 8th 2020
- National Disaster Management Agency (BNPB) announced Indonesian government extended the COVID-19 national emergency status from February 29 until May 29
- President is declaring a Covid-19 public health emergency and imposed large-scale social restrictions to respond to the escalating figures of the outbreak on Indonesian soil
- Novel coronavirus confirmed case spread across 32 provinces with capital city of Jakarta as the epicenter. On the top rank DKI Jakarta with 1.470 case, West Java 365 case, Banten 212 case, East Java 196 case.

- The central government has assigned large-scale social restriction (PSBB) to be implemented in Jakarta administration, following the governor's proposal to impose PSBB.
- A total of 16 provinces and 86 districts and cities have formed the task force covid-19

II. Overview

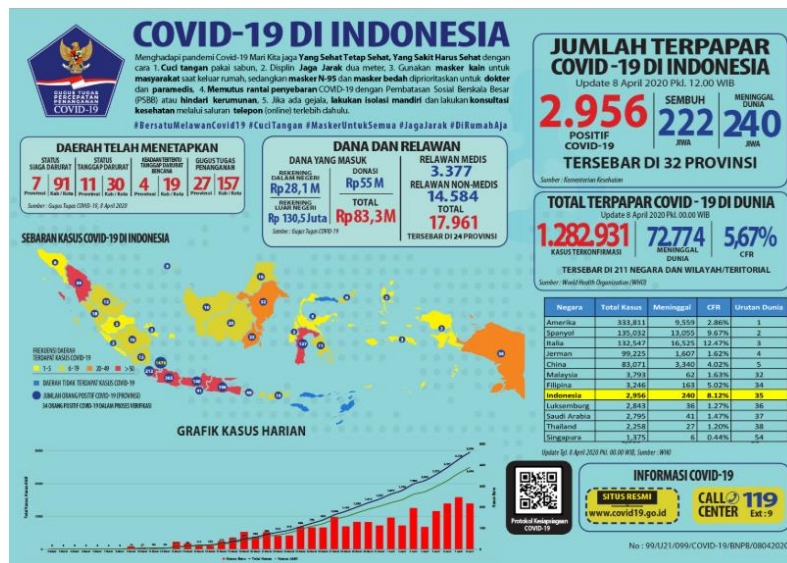

After the president announced a Covid-19 public health emergency and imposed large-scale social restrictions by issued Presidential Decree no. 21 of 2020, some region will apply to impose PSBB. Jakarta is the first region who propose proposal to impose PSBB in its region. Health minister grants Jakarta's request to impose large-scale social restrictions in Jakarta. Because the proposal has been supported with existing data that show there has been a significant increase and rapid spread of Covid-19 cases, accompanied by local transmission occurrences in the province of Jakarta. Then, the results of epidemiological studies and the consideration of regional preparedness in social, economic and other aspects, large-scale social restrictions need to be implemented in Jakarta to reduce the spread of Covid-19. The Governor's will impose from April 10, to the next 14 days. Jakarta is the first region who proposed PSBB DKI Jakarta is the first region who proposed proposal to impose PSBB, while, five regions in west Java Provinces will apply to jointly implement the PSBB to tackle the Covid-19 outbreak.

Based on the release of the official website of COVID-19 rapid response task force as of April 8, 2020 there were additional case, with a total number of confirmed cases of 2.956 cases, 222 of them were recoveries and 240 died.

Situation Report #8
