

Sitrep #1 Landslide in West Bandung Regency

Saturday, January 24, 2026

Type of Incident : Landslide
Location : West Bandung Regency
Type of Incident : Friday, January 23, 2026

I. Key Information

- High rainfall intensity since Friday (23 January 2026) triggered flooding accompanied by landslides in Pasirlangu Village, Cisarua Sub-district, West Bandung Regency.
- A total of 30 houses were swept away and buried under landslide debris, affecting 34 households or 113 people, 10 people dead, 23 people survived, 85 people remain unaccounted for.

II. Situation Overview

Flooding and landslides caused 30 houses in Pasirkuning Hamlet (RT.05/11) and Pasirkuda Hamlet (RT.01/10) to be swept away and severely damaged. A total of 113 affected people were recorded, consisting of 23 survivors, 10 people dead whose bodies have been recovered, and 85 people whose whereabouts remain unknown. One house in Babakan Cibudah (RT.05/07) sustained severe damage, and its 4 occupants were successfully evacuated in safe condition. The landslide resulted in the displacement of 394 people from 121 households, who are currently staying at evacuation posts in Pasirlangu Village or seeking shelter independently. The demographic breakdown of affected people includes 135 adult men, 141 adult women, 13 infants, 89 children under five, 30 elderly people, and 1 pregnant woman.

At present, the Joint SAR Team continues search operations for people buried under collapsed buildings, using visual observation, manual excavation, soil spraying with portable water pumps, and monitoring through UAV drones.

The Human Initiative team is coordinating with the Regional Disaster Management Agency (BPBD) of West Bandung Regency to conduct rapid needs assessments in the field and has deployed an emergency kitchen to the displacement sites..

III. Human Initiative's Response
